SUMMARY

Information Technology student with a strong foundation in Python, data analysis, machine learning, and statistics. Hands-on experience in data cleaning, preprocessing, exploratory data analysis, feature engineering, and predictive modeling using Pandas, NumPy, and Scikit-learn. Interested in transforming data into actionable insights and developing data-driven solutions to real-world problems.

EDUCATION

Pillai College of Engineering, New Panvel 2023 – 2027
Bachelor of Technology in Information Technology **CGPA: 9.66/10**

EXPERIENCE

Data Analytics Intern – Cloud Counselage Pvt Ltd Jun 2026 – Sep 2026

- Worked on data analytics tasks involving data cleaning, preprocessing, analysis, and interpretation of datasets.
- Applied Python, SQL, and data visualization concepts to analyze data and derive meaningful insights.
- Prepared analysis results and supporting documentation as part of internship deliverables.

TECHNICAL SKILLS

Programming	Python, Java
AI & ML	Machine Learning, Deep Learning, Computer Vision, TensorFlow, Keras, Scikit-learn
Data Analysis	Pandas, NumPy, Data Analysis, Data Visualization
Databases	SQL, MySQL, MongoDB
Web & APIs	FastAPI, Flask, React, REST APIs, HTML, CSS
Core Concepts	OOP, DSA, DBMS
Tools	Git, GitHub, AWS, Power BI, Streamlit, Android Studio
Soft Skills	Problem Solving, Analytical Thinking, Teamwork, Communication, Adaptability

PROJECTS

NutriVision-AI 2026

- Developed an AI-based Indian food recognition and nutrition analysis application using a 20-class image dataset and a TensorFlow/Keras classification model.
- Built a FastAPI backend for image preprocessing, food prediction, confidence scoring, nutrition lookup, health-score calculation, and dietary recommendations.
- Developed a React + Tailwind CSS frontend integrated with the backend REST API for image uploads, prediction results, nutrition details, and recommendations.

Live Demo: https://nutrivision-ai-web.vercel.app/
Technologies: Python, TensorFlow, Keras, FastAPI, React, Tailwind CSS, NumPy, Pillow, REST API

Smart Outfit Recommender 2025 – 2026

- Developed a web application for body-shape detection and personalized outfit recommendations.
- Extracted body measurements and visual features using OpenCV and MediaPipe.
- Combined machine learning predictions with rule-based recommendation logic to generate personalized suggestions.

Live Demo: https://smart-outfit-recommendation.onrender.com/
Technologies: Python, Flask, OpenCV, MediaPipe, Scikit-learn

Student Performance Predictor 2025

- Developed a machine learning application to predict exam scores using academic, behavioral, and environmental factors.
- Performed data cleaning, feature engineering, and comparative evaluation of Linear Regression, Random Forest, and XGBoost.
- Built an interactive Streamlit application for real-time exam score prediction and performance assessment.

Live Demo: https://studentperformancepredictor-dlwto5sjqs6lkwwqx5de79.streamlit.app/
Technologies: Python, Pandas, NumPy, Scikit-learn, XGBoost, Streamlit

CERTIFICATIONS

- Google Cloud – Generative AI Program
- NPTEL – Java Programming
- Spoken Tutorial (IIT Bombay) – Python
- Deloitte Australia – Data Analytics Job Simulation
