SUMMARY

Information Technology student with a strong foundation in Python, SQL, data science, and machine learning. Experienced in data preprocessing, exploratory data analysis (EDA), feature engineering, and predictive modeling using Pandas, NumPy, and Scikit-learn. Skilled in model evaluation and developing data-driven solutions to address real-world problems.

EDUCATION

Pillai College of Engineering, New Panvel 2023 – 2027

Bachelor of Technology in Information Technology **CGPA: 9.66/10**

EXPERIENCE

Data Analytics Intern – Cloud Counselage Pvt. Ltd. Jun 2026 – Sep 2026

- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) to prepare datasets for analysis.
- Used Python, SQL, and data visualization techniques to analyze data, identify patterns, and derive meaningful insights.
- Applied analytical and problem-solving skills to interpret data and support data-driven decision-making.

TECHNICAL SKILLS

Programming	Python, Java, SQL
Databases	MySQL, MongoDB
Data Science & ML	Pandas, NumPy, Scikit-learn, TensorFlow, Keras, OpenCV,EDA
Development	React.js, HTML, CSS, JavaScript
Tools	Git, GitHub, Jupyter Notebook, Streamlit, Power BI

PROJECTS

NutriVision-AI

- Developed an AI-based Indian food recognition and nutrition analysis application using Python, TensorFlow/Keras, and a 20-class Indian food image dataset.
- Built a FastAPI backend for image preprocessing, prediction, nutrition lookup, health scoring, and rule-based recommendations.
- Integrated a React and Tailwind CSS frontend with the backend using REST APIs to display predictions and nutrition insights.

Live Demo: NutriVision-AI

Smart Outfit Recommender

- Developed a Python and Flask web application for body-shape detection and personalized outfit recommendations.
- Used OpenCV and MediaPipe to extract body measurements and Scikit-learn to generate machine learning predictions.
- Combined Random Forest predictions with rule-based logic to recommend suitable outfits.

Live Demo: Smart Outfit Recommender

Student Performance Predictor

- Developed a Python-based machine learning application to predict exam scores using academic, behavioral, and environmental factors.
- Used Pandas and NumPy for data preprocessing and feature engineering, and compared Linear Regression, Random Forest, and XGBoost models.
- Built an interactive Streamlit application for exam-score prediction and performance assessment using Scikit-learn and XGBoost.

Live Demo: Student Performance Predictor

CERTIFICATIONS

- Spoken Tutorial (IIT Bombay) – Python
- Deloitte Australia – Data Analytics Job Simulation
- TATA – Gen AI Powered Data Analytics
- Google Cloud – Generative AI Program
- NPTEL – Java Programming
