SUMMARY

Information Technology student with a strong foundation in Python, machine learning, data analysis, and problem solving, with hands-on experience developing AI/ML applications. Experienced in TensorFlow, Keras, Scikit-learn, computer vision, APIs, and data processing. Interested in building practical AI/ML solutions and applying machine learning to real-world problems.

EDUCATION

Pillai College of Engineering, New Panvel 2023 – 2027
Bachelor of Technology in Information Technology **CGPA: 9.66/10**

EXPERIENCE

Data Analytics Intern – Cloud Counselage Pvt Ltd Jun 2026 – Sep 2026

- Worked on data analytics tasks involving data cleaning, preprocessing, analysis, and interpretation of datasets.
- Applied Python, SQL, and data visualization concepts to analyze data and derive meaningful insights.
- Prepared analysis results and supporting documentation as part of internship deliverables.

TECHNICAL SKILLS

Programming	Python, Java, SQL
AI & ML	Machine Learning, Deep Learning, Computer Vision, TensorFlow, Keras, Scikit-learn
Data Analysis	Pandas, NumPy, Data Analysis, Data Visualization
Databases	MySQL, MongoDB
Web & APIs	FastAPI, Flask, React, REST APIs, HTML, CSS
Core Concepts	OOP, DSA, DBMS
Tools	Git, GitHub, AWS, Power BI, Streamlit, Android Studio,LabelImg
Soft Skills	Problem Solving, Analytical Thinking, Teamwork, Communication, Adaptability

PROJECTS

NutriVision-AI 2026

- Developed an AI-based Indian food recognition and nutrition analysis application using a 20-class Indian food image dataset with a TensorFlow/Keras image classification model.
- Built a FastAPI backend for image preprocessing, food prediction, confidence scoring, nutrition lookup, health-score calculation, and rule-based dietary recommendations.
- Developed a React + Tailwind CSS frontend integrated with the backend REST API for image upload, prediction results, nutrition details, health score, and recommendations.

Live Demo: https://nutrivision-ai-web.vercel.app/
Technologies: Python, TensorFlow, Keras, FastAPI, React, Tailwind CSS, NumPy, Pillow, REST API

Smart Outfit Recommender 2025 – 2026

- Developed a web application for body-shape detection and personalized outfit recommendations.
- Extracted body measurements and visual features using OpenCV and MediaPipe.
- Combined machine learning predictions with rule-based recommendation logic to generate personalized suggestions.

Live Demo: https://smart-outfit-recommendation.onrender.com/
Technologies: Python, Flask, OpenCV, MediaPipe, Scikit-learn

Trackify – Expense Tracking Application 2024 – 2025

- Built an Android application for personal expense tracking and financial management.
- Implemented transaction management, expense categorization, and spending summaries.
- Used local storage for persistent data handling and efficient application performance.

Technologies: Java, Android Studio

CERTIFICATIONS

- Google Cloud – Generative AI Program
- Spoken Tutorial (IIT Bombay) – Python
- NPTEL – Java Programming
- Deloitte Australia – Data Analytics Job Simulation
