SUMMARY

Information Technology student with a strong foundation in Python, machine learning, data analysis, and problem solving, with hands-on experience developing AI/ML applications. Experienced in TensorFlow, Keras, Scikit-learn, computer vision, APIs, and data processing. Interested in building practical AI/ML solutions and applying machine learning to real-world problems.

EDUCATION

Pillai College of Engineering, New Panvel 2023 – 2027
Bachelor of Technology in Information Technology **CGPA: 9.66/10**

EXPERIENCE

Data Analytics Intern – Cloud Counselage Pvt Ltd Jun 2026 – Sep 2026

- Worked on data analytics tasks involving data cleaning, preprocessing, analysis, and interpretation of datasets.
- Applied Python, SQL, and data visualization concepts to analyze data and derive meaningful insights.
- Prepared analysis results and supporting documentation as part of internship deliverables.

TECHNICAL SKILLS

Programming	Python, Java, SQL
AI & ML	Machine Learning, Computer Vision, TensorFlow, Keras, Scikit-learn
Data Analysis	Pandas, NumPy, Data Analysis, Data Visualization
Databases	MySQL, MongoDB
Web & APIs	FastAPI, React.js, REST APIs, HTML, CSS, JavaScript
Core Concepts	OOP, DBMS
Tools	Git, GitHub, Streamlit, PostgreSQL, Android Studio, LabelImg

PROJECTS

NutriVision-AI
Python, TensorFlow, Keras, FastAPI, React, Tailwind CSS, NumPy, REST APIs

- Developed an AI-based Indian food recognition application using a 20-class image dataset and a TensorFlow/Keras image classification model.
- Built a FastAPI backend for image preprocessing, prediction, confidence scoring, nutrition lookup, and rule-based dietary recommendations.
- Integrated the backend with a React and Tailwind CSS frontend using REST APIs.

Live Demo: NutriVision-AI

Smart Outfit Recommender
Python, Flask, OpenCV, MediaPipe, Scikit-learn

- Developed a Flask application for body-shape detection and personalized outfit recommendations.
- Extracted body measurements and visual features using OpenCV and MediaPipe.
- Applied a Random Forest classifier and rule-based logic to generate outfit recommendations.

Live Demo: Smart Outfit Recommender

DARPAN – Dark Pattern Detection System
Python, YOLOv8, OpenCV, LabelImg, Computer Vision

- Developing a system to detect deceptive interface patterns in booking-platform screenshots using computer vision.
- Annotated screenshot datasets using LabelImg and trained YOLO-based object detection models to identify visual dark patterns.
- Evaluated model performance and analyzed classification errors to improve detection accuracy.

CERTIFICATIONS

- Google Cloud – Generative AI Program
- Spoken Tutorial (IIT Bombay) – Python
- NPTEL – Java Programming
- Deloitte Australia – Data Analytics Job Simulation
